Rockford Products Corporation
Attn: Harold W. Naill
707 Harrison Avenue
Rockford, IL 61101

Dear Mr. Naill:

The closure plan submitted by yourself, dated November 14, 1985, and received by this Agency on November 8, 1985, to close the hazardous waste storage area are hereby approved.

Under the terms of Title 35, Illinois Administrative Code (35 IAC) Subtitle G Section 725.212(d) the closure plan as submitted by yourself is hereby modified to include those items listed below. All other provisions of the submitted closure plan which have not been modified remain the same:

1. Parameters to be tested in wipe tests shall be for totals of barium, cadmium, chromium, copper, lead, nickel, silver, zinc, cyanide, mercury, selenium and arsenic.
2. The solvent used in the wipe test described in Exhibit C shall be 0.5 Normal acetic acid instead of distilled water.
3. If the wipe test results indicate the contaminant level for any of the proposed parameters is higher in the pit than in the background area, the pit shall be decontaminated by an appropriate method and the pit shall be retested. This process (decontaminating and retesting) shall be repeated until it is demonstrated that contaminant levels are no greater in the pit than in the background area.
4. The following shall accompany certification of closure:
 - i. The laboratory test results for the wipe tests.
 - ii. Copies of the manifest for waste present at the time of closure and the rinse water used in decontaminating the pit.
 - iii. A brief narrative describing the location of the background area with respect to the pit and explaining that there is not a six inch concrete slab covering the pit as suggested by the drawing in Exhibit B.

When the owner or operator must submit to the Director a certification both by the owner or operator and by an independent registered professional engineer that the facility has been closed in accordance with the provisions in the approved closure plan. These certifications must be submitted at this Agency within 30 days after closure, or by March 7, 1986.

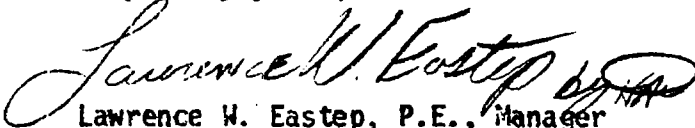

If the Agency determines that implementation of the closure plan fails to satisfy the requirements of 35 IAC 725.211, the Agency reserves the right to amend this closure plan.

All certifications, logs, or reports which are required to be submitted to the Agency by the facility should be mailed to the following address:

Illinois Environmental Protection Agency
Division of Land Pollution Control
Permit Section
2200 Churchill Road
Springfield, Illinois 62706

This letter constitutes final action on this matter by the Agency. Should you have any questions concerning this, please contact Chris Liebman at 217/782-0451.

Very truly yours,

Lawrence W. Eastep, P.E., Manager
Permit Section

Closure shall be: ☒ Complete ☐ Partial (check one)

1. Attach the Part A for this facility and a map diagram or picture showing the facility lay-out and the area(s) to be closed. SEE PAGE 5 of 5 OF RCRA PART A - ALSO ATTACHMENT A AND EXHIBIT B.
2. State the reason of closure.
A HAZARDOUS WASTE TREATMENT FACILITY HAS BEEN LOCATED, WHICH CAN REGULARLY HANDLE THE WASTE FROM THIS FACILITY. THUS, WASTE DOES NOT STAY AT THIS FACILITY FOR PERIODS GREATER THAN 90 DAYS.
3. Provide an estimate of the maximum inventory of waste in storage during the life of the facility. Include a list of hazardous wastes, their codes, and amount in storage at the time of closure.
A MAXIMUM OF 250 - 55 GALLON BARRELS WERE IN STORAGE DURING THE LIFE OF THE FACILITY. THE WASTE INCLUDED SPENT CYANIDE PLATING SOLUTION FROM ELECTRO PLATING OPERATION WITH A HAZARDOUS WASTE CODE NO. F007. THE AMOUNT IN STORAGE AT THE TIME OF CLOSURE WAS ZERO.
4. Provide a schedule of closure that briefly describes how and when the facility will be closed.
THE FACILITY WAS CLOSED ON MAY 14, 1985, WHEN THE LAST 55 GALLON DRUMS WERE REMOVED FROM THE STORAGE AREA TO BE SENT TO THE TREATMENT FACILITY. THE FLOOR WAS CLEANED OF BROKEN PALLETS, PAPER SCRAPS AND DIRT. NO DRUMS WERE LEAKING AND NO MATERIAL WAS SPILLED IN THE SITE. THE FLOOR WAS SCRUBBED AND TRIPLE RINSED AND EACH RINSE WAS TESTED FOR CYANIDE, AND HEAVY METALS (COPPER, CADMIUM, ZINC, NICKLE, ARSENIC, BARIUM CHROMIUM, LEAD, MERCURY, SELENIUM, SILVER. NO CONTAMINATION WAS FOUND.

5. Describe the steps taken at the time of closure to remove hazardous waste residues from the tank(s), its' discharge control equipment and discharge confinement structures.

NA

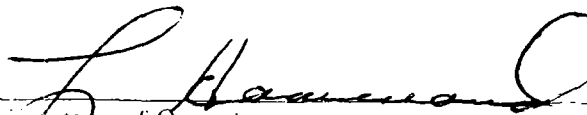

6. Describe the steps taken to remove containers, liners, base and soil containing or contaminated with hazardous waste.

THE CONTAINERS (55 BALLON DRUMS) WERE REMOVED FROM THE SITE AND SHIPPED TO A TREATMENT FACILITY. THE STORAGE SITE WAS INSIDE THE BUILDING IN A RECESSED PIT WITH CONCRETE WALLS AND FLOOR. THERE WERE NO LINERS OR SOIL CONTAMINATION INVOLVED WITH THIS STORAGE FACILITY.

SEE EXHIBIT C

ANY LIQUIDS REMOVED FROM PIT AREA MAY BE DESTROYED BY TREATMENT IN ROCKFORD PRODUCTS CORPORATION WASTE WATER TREATMENT SYSTEM - IEPA PERMIT NO. 1983-EP-2722 OR BY HAULING TO A LICENSED TREATMENT FACILITY.

Certification: The undersigned hereby makes an application for a Closure Plan approval and certifies that the information referenced herein is true, correct and current.
